Subject: Please hold the line against Developer changes to the King St project

Dear Members of the Planning Board: Mark Montanari, Anna Hueston, Bartlett Harvey, Jeffery Yates, Daryl Kent-Baker, and Mark Rambacher,

Please do not grant any variances to the developer of the King St. Project.

I believe that the residents of Littleton understood this development to be an expansion of our Common and downtown area. To me this means that the development would be friendly, open and walkable from the Common.

I have heard that the developer is planning to put the backs of the businesses facing King Street- indeed their smelly dumpsters would be stored there. They also suggested a wall to hide the ugliness. That is not open or friendly.

It doesn't matter what the freeway sees- it matters what our town sees. I was excited for this expansion of our community, and understood that it would be integrated with the Common. This development is not part of the freeway, it is part of the town and it should enlarge the visual open space of the Common, not wall it off.

Sincerely,

Christine Brown
