\*\*THIS EMAIL WAS SENT BY AN EXTERNAL SENDER\*\*

Hi Amy,

We are looking into getting started on our project and we're considering going with a modular home. The issue with modular is that they are limited to specific envelope sizes. Because of this we are asking to slightly increase the envelope that was approved by Littleton ConComm.

I have attached the original plan approved by Littleton ConComm and a couple of different revision possibilities to the original plan pending your approval.

The first floor plan expands the envelope 2 feet wider and 2 feet longer than ConComm approved. The second option floor plan is 4 feet wider and 2 feet longer but does not include the 5 foot front deck.

We are looking for approval of both plans because the modular company has to measure to ensure it can fit down Cricket Lane with the 14 foot modular section.

Respectfully,

Peter McAnespie and Sue Clark
