THIS EMAIL WAS SENT BY AN EXTERNAL SENDER

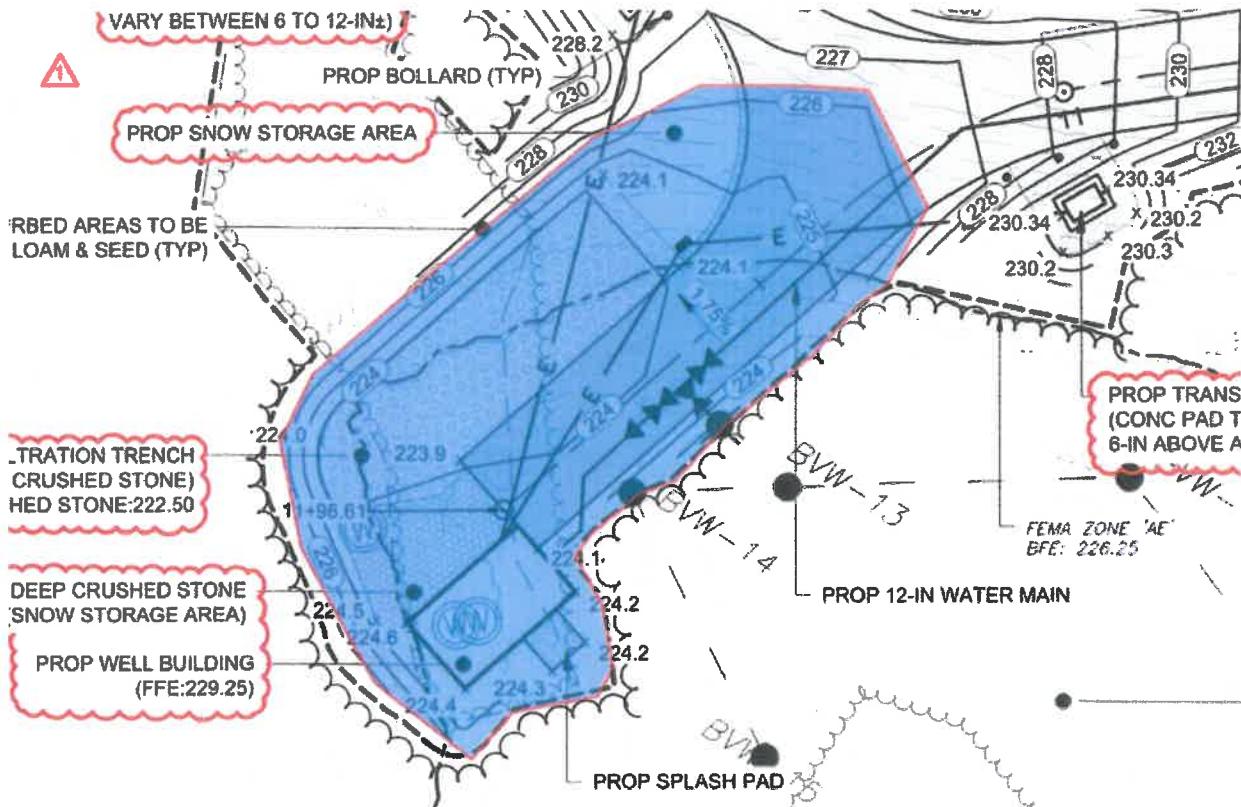

Maren,

Please see attached for our review of the revised materials.

They have addressed all of our comments except for the following open comments:

3/3A/12/12A Recommend condition of approval for stormwater test pits prior to construction.

5/5A It looks like their finish floor is much higher than the ground but there are no stairs/ramp shown on the plan. We are not sure if this needs to be ADA compliant or not. Also, the finish floor is above the 100 year flood plain elevation but the area around it is within the proposed flood zone (see area in blue below). We defer to the board if this is ok. I'm not sure but this maybe more within the building department scope of review.

10/10A they aren't providing pretreatment for the trench but based on the volumes they are providing enough for treatment and pretreatment. We are ok with this approach but defer to MassDEP for final approval.

16/16A This is just the standard O&M signature condition of approval.

Thanks,

Jim
